- Identify three medical play techniques that may be applied to work with children

Completed on

**18 April 2019 (duration of 1 hour/s)**

**This equates to 1 CPD Hour/s (Continuing Professional Development)**

### REFLECTION:

This presentation introduces nurses to the field of medical play therapy. Play therapy is an emerging profession in Australia and is useful for children who have an acute or chronic medical diagnosis. In medical play therapy, the focus is always on the child first and how the diagnosis and/or treatment may impact on the child's physical condition and in relation to the child's mental health and well-being.
