Presenter The Nursing CPD Institute

In this session you will:

- Gain an understanding of the aetiology of Down Syndrome
- Learn the modes of diagnosis of Down Syndrome
- Receive knowledge regarding the medical conditions that may be found in those with Down Syndrome
  
- Gain knowledge regarding key topics that should be incorporated into the care of a person with Down Syndrome

Completed on

**03 April 2019 (duration of 1 hour/s)**

**This equates to 1 CPD Hour/s (Continuing Professional Development)**

#### REFLECTION:

According to Down Syndrome Australia, there are over 13,000 people with Down Syndrome. Down Syndrome is one of the leading causes of intellectual disability. These patients face various health issues including learning and memory, congenital heart diseases, Alzheimer's diseases, leukaemia, cancers and Hirschprung disease. This session reviews the aetiology, diagnosis, and specific care management considerations.
