Continuing Professional Education

This is to certify that

Caleb Fellowes

completed an online educational tutorial and assessment with the

Australian Nursing and Midwifery Federation

on 12th December, 2020

Upper Airway Obstruction

Knowledge and skills gained: describe the anatomical structures of the upper respiratory system and their functions, outline the physiology of internal and external respiration, understand the anatomical and physiological requirements for normal respiratory function, perform a clinical assessment of normal respiratory function and assessing clinical signs of impaired respiratory function, describe the differences in presentation between a partial, severe and complete upper airway obstruction, describe the management of each level of severity, recognise the structures involved in the obstruction and the pathophysiology occurring, and initiate appropriate basic interventions to maintain life support and prepare for advanced techniques should they be required.
