- Understand the key steps to be adhered to in the investigative process for Norovirus Outbreak

Completed on

15 April 2019 (duration of 1 hour/s)

This equates to 1 CPD Hour/s (Continuing Professional Development)

REFLECTION:

Noroviruses are the most common cause of epidemic gastroenteritis and are responsible for at least 50% of all gastroenteritis outbreaks worldwide and are a major cause of foodborne illness. Outbreaks occur in residential care facilities, hospitals, schools and child care centres. Viral gastroenteritis is highly infectious and outbreaks can be difficult to control.

Cheryl Dezotti

Director of the Nursing CPD Institute
