

Certificate of Completion

THIS CERTIFIES THAT
CALEB FELLOWES

has participated in the following education session:

Antihypertensives and Renal Function

Presenter Mel Antonel

In this session, you will:

- Gain an understanding of the different classes of blood pressure medications
- Acquire knowledge about how the kidneys play a role in blood pressure
- Receive information regarding which blood pressure medications are suitable in renally impaired patients
- Explore options and solutions for the side effects

Completed on

02 April 2019 (duration of 1 hour/s)

This equates to 1 CPD Hour/s (Continuing Professional Development)

REFLECTION:

In this webinar I learned how the kidneys regulate blood pressure as well as exploring all the different classes of blood pressure medications. This included learning about the side-effects and contraindications to these medications in renally-impaired patients. I also revisited an overview of the RAAS and how it regulates blood pressure, fluid status, electrolytes and acid-base balance.
