This equates to 1 CPD Hour/s (Continuing Professional Development)

REFLECTION:

The Infant Feeding Guidelines are aimed at health workers to assist them in providing consistent advice to the general public about breastfeeding and infant feeding. They support optimum infant nutrition by providing a review of the evidence, and clear evidence-based recommendations on infant feeding for health workers. While every health worker should actively promote and encourage breastfeeding, not every mother will do so. The NHMRC guidelines identify best practice for alternative choices.
