

This certifies that

Caleb Fellowes

has completed the

Cardiorespiratory and Orthopaedic Physiotherapy eLearning Course

This eLearning course has been developed as an education resource for physiotherapists providing cardiorespiratory and orthopaedic services in Queensland Health hospitals. The package aims to promote safe, evidence-based clinical practice and is a supplement to the Cardiorespiratory and Orthopaedic Physiotherapy (CROP) face-to-face course. Principles of assessment and treatment within cardiorespiratory and orthopaedic caseloads are reviewed, which are essential for physiotherapists providing hospital based inpatient care and after-hour services.
