

Certificate of Completion

THIS CERTIFIES THAT
CALEB FELLOWES

has participated in the following education session:
Vaccine Preventable Disease: Varicella

Presenter The Nursing CPD Institute

In this session you will:

- Gain information regarding the epidemiology of Varicella in Australia
- Learn the clinical features of this disease
- Gain knowledge regarding the currently available vaccines in Australia
- Attain information regarding vaccine precautions, considerations including special groups of individuals and the protocol for the vaccine administration

Completed on

03 April 2019 (duration of 1 hour/s)

This equates to 1 CPD Hour/s (Continuing Professional Development)

REFLECTION:

The Australian Immunisation Handbook 10th Edition (2015) provides good information on vaccine preventable communicable diseases.

'Varicella is a highly contagious infection spread by respiratory secretions, including aerosol transmission, or from the vesicle fluid of the skin lesions of varicella or zoster infection. It is usually a mild disease of childhood. Complications occur in approximate 1% of cases. It is more severe in adults and in persons of any age who are immunocompromised, in whom complications, disseminated disease and fatal illness can occur.'

Cheryl Dezotti

Director of the Nursing CPD Institute
