

Certificate of Completion

THIS CERTIFIES THAT
CALEB FELLOWES

has participated in the following education session:

Best Practice Guidelines: Critically Ill Patients & Pressure Injury Prevention

Presenter The Nursing CPD Institute

In this session you will:

- Gain knowledge regarding the current best practice recommendations for the prevention of pressure injuries in critically ill adult patients
- Receive information regarding recommended assessment tools and processes to follow
- Gain knowledge of Nursing strategies to reduce the incidence of pressure injuries
- Learn definitions for the various pressure injury categories

Completed on

04 April 2019 (duration of 1 hour/s)

This equates to 1 CPD Hour/s (Continuing Professional Development)

REFLECTION:

Pressure injuries remain a major problem in healthcare with adults in intensive care at increased risk. For patients, pressure injuries result in significant pain, quality of life impacts and they also slow recovery. The National Commission on Safety and Quality has prioritised pressure injury prevention (Standard 8). The resource for this session is Pressure Injury Prevention for Critically Ill Adults; A clinical practice guideline produced by the Agency for Clinical Innovation (NSW Government 2014).
