

Certificate of Completion

THIS CERTIFIES THAT
CALEB FELLOWES

has participated in the following education session:

Acute Croup in Children

Presenter The Nursing CPD Institute

In this session you will:

- Learn about the incidence and aetiology of Croup
- Gain knowledge regarding the assessment processes for diagnosing Croup and the potentially life-threatening conditions Acute Epiglottitis and Bacterial Tracheitis
- Receive information regarding the varied clinical severity of Croup and the related care management strategies
- Reflect on your related workplace practices

Completed on

02 May 2019 (duration of 1 hour/s)

This equates to 1 CPD Hour/s (Continuing Professional Development)

REFLECTION:

Nurses working in Emergency Departments and Paediatric Units will find this quiz of interest and provides good reminders. Croup is an often frightening condition for the caregivers and the child. Croup is an acute illness characterised by mucosal swelling and inflammation of the larynx, subglottic area and upper trachea (laryngotracheitis).

Cheryl Dezotti

Director of the Nursing CPD Institute
