

Certificate of Completion

THIS CERTIFIES THAT
CALEB FELLOWES

has participated in the following education session:
Competency: Indwelling Urinary Catheter Care

Presenter The Nursing CPD Institute

In this session you will:

- Learn about the risks associated with indwelling urinary catheters
- Gain knowledge regarding the indications for the use of indwelling urinary catheters
- Receive information on practical steps that should be taken to minimise the risk of indwelling urinary catheter associated complications
- Receive information to support your application of infection control practices in the workplace

Completed on

02 May 2019 (duration of 2 hour/s)

This equates to 2 CPD Hour/s (Continuing Professional Development)

REFLECTION:

Nurses are aware that catheterising patients places them at significant risk of acquiring a urinary tract infection. The risk of infection is associated with the method and duration of catheterisation, the quality of catheter care and host susceptibility.

The Australia and New Zealand Urological Nurses Society Inc (ANZUNS) Clinical Practice Guidelines for Catheterisation form the basis for this session.

Cheryl Dezotti

Director of the Nursing CPD Institute
