Calculation and Administration of Medicines

The ability to perform quick and accurate calculations of medications for administration is a vital skill, yet many practitioners question their mathematical skills. Maintaining competency is pivotal in the prevention of medication errors and patient safety. This course covers basic mathematics, metric conversions, formulas and calculations for oral, injectable and intravenous medications.

Refresh your knowledge of basic mathematic principles

Refresh your knowledge of metric units and formulas used in medication calculations

Understand how and why medication errors occur

Given the opportunity to practice your medication calculations

Ability to check your competence in medication administration and calculations

Feel confident in your medication calculation abilities
