

Certificate of Completion

THIS CERTIFIES THAT
CALEB FELLOWES

has participated in the following education session:

Atrial Fibrillation in the 21st Century!

Presenter The Nursing CPD Institute

In this session you will:

- Gain knowledge about the risk factors associated with Atrial Fibrillation including genetics, age and sex, metabolic syndrome, obesity, type 2 diabetes, dyslipidemia, hypertension, physical exertion, caffeine and alcohol use
- Learn about lesser known risk factors associated with Atrial Fibrillation including low serum thyrotropin and subclinical hyperthyroidism
- Receive information regarding non-pharmacologic atrial fibrillation prevention strategies
- Understand that new risk factors for Atrial Fibrillation continue to be identified with time

Completed on

03 May 2019 (duration of 1 hour/s)

This equates to 1 CPD Hour/s (Continuing Professional Development)

REFLECTION:

Atrial fibrillation (AF) is the most common arrhythmia worldwide, and it has a significant effect on morbidity and mortality. It is a significant risk factor for stroke and peripheral embolization, and it has an effect on cardiac function.

Cheryl Dezotti
