

Certificate of Completion

THIS CERTIFIES THAT
CALEB FELLOWES

has participated in the following education session:
Medical Patients Blood Management Guidelines

Presenter The Nursing CPD Institute

In this session you will:

- Gain information regarding the effect of anaemia on a range of medical conditions
- Learn about specific recommendations for transfusion that are relevant for particular medical circumstances
- Gain information regarding the effect of fresh frozen plasma, cryoprecipitate, fibrinogen concentrate, and/or platelet transfusion on patient outcomes
- Learn about the risks associated with blood / blood product transfusions

Completed on

02 May 2019 (duration of 3 hour/s)

This equates to 3 CPD Hour/s (Continuing Professional Development)

REFLECTION:

Nurses regularly participate in Patient Blood Management and are required to be up to date with related clinical practice recommendations and guidelines. The National Blood Authority of Australia has published a guide to Medical Patient Blood Management Guidelines. They are intended to assist and guide clinical decisions and coordination of health-care across the primary, secondary and tertiary care settings for patients with acute or chronic medical conditions requiring haematological intervention. Transfusion decisions for patients should also take into account each individual's clinical circumstances and physiological status, and their treatment preferences and choices. This document is approved by the National Health and Medical Research Council.
