

Certificate of Completion

THIS CERTIFIES THAT
CALEB FELLOWES

has participated in the following education session:
Childhood Stroke, Clinical Guideline 2017

Presenter The Nursing CPD Institute

In this session you will:

- Gain an understanding of the different types of stroke that may occur in children
- Gain general knowledge regarding the known risk factors for stroke in children
- Receive information regarding the investigations that should be undertaken
- Become familiar with core care strategies that should be implemented in the acute setting

Completed on

22 April 2019 (duration of 2 hour/s)

This equates to 2 CPD Hour/s (Continuing Professional Development)

REFLECTION:

'In children, stroke is among the top ten causes of death, is more common than brain tumours and is the leading cause of hemiplegic cerebral palsy in term-born infants. Like adults 'time is brain' for children who suffer a stroke. Affected children carry resulting disabilities for a lifetime, at great cost to families, health services and most importantly the child's future.'

This session explores the recommendations contained in the 2017 clinical guidelines developed by the 'Australian Childhood Stroke Advisory Committee (ACSAC) in response to the needs of professionals and families for a consistent approach to childhood stroke in Australia. It includes more than 60 recommendations to help emergency staff and paediatricians in diagnosing and managing children with stroke upon arrival to hospital.'
